Thu Duc City, Ho Chi Minh

SUMMARY

I'm a backend developer with a strong foundation in Java, PHP, and JavaScript. Proficient in frameworks such as NodeJS, Spring Boot, Laravel with hands-on experience in developing RESTful APIs, WebSocket, gRPC and GraphQL. Knowledgeable in database management using SQL, MySQL, PostgreSQL, MongoDB and deploy Product with Docker, CI/CD tool. Demonstrated ability to work collaboratively in a team environment. Recent Software Technolgy graduate .Eager to learn and grow in a dynamic and innovative organization.

OBJECTIVE

- Become a senior full-stack developer who can do all stages from design analysis, to frontend, backend and server configuaration in next 5 year
- Become Solution Architect able to design large systems using big data capable of using milions of people in next 7 years
- Became CTO at the age of 35

SKILL

Docker, Jenkins, CI/CD Linux/ Ubuntu, DevOps, HTTPS/SSL, Nginx	NodeJS, Spring Boot, Laravel Spring MVC, ExpressJS, Android	JavaScript, Java, C#, .NET , PHP, Python, HTML, CSS	Firebase, MySQL, SQL Server, PostgreSQL, MongoDB

RESTful APIs, gRPC, GraphQL, WebSocket

PROFESSIONAL EXPERIENCE

CrossTech

Back-end Development (NodeJS, Mysql)   **Mar 2023 - Mar 2024**

Develop features for the CoCo Mentor application Mentee, deploy applications to AWS servers

Accomplishments:
- Create push notification functionality with FireBase.
- Use Sequelize to map to the database and execute queries
- Perform functions such as filtering, adding, deleting, editing profiles, courses, comments, reviews,...Design some improved database tables to store data
- Deploy Back-End to server AWS with Docker
- Upload Image with Cloudiary ,...
- Deploying CI/CD for the project

VNPT-Media   **Jul 2023 - Dec 2023**

Android Development - Fresher (Kotlin)

Demonstrated legacy source understanding and seeing performance issues in Application. To contribute maintain and fix performance issues.

Accomplishments:
- Update the function of managing users' personal pages.
- Create a Dialog class used to display notifications to the user
- Develop profile management function on tablet

Myaloha   **Sep 2024 - NOW**

Fullstack Developer (Laravel, VueJS)

Programming and developing public service systems and online exam website myaloha.vn.

Accomplishments:

- Optimize search processing and natural language processing.
- Handle online exam anti-cheating system.
- Build a feature to handle exam uploads in python using AI.
- Developing online exam packages for state-owned enterprises with millions of exams.

EDUCATION

Posts and Telecommunications Institute of Technology

Major: Software technology

CERTIFICATE

Scrum Master (2022) : link certificate   **DevOps(2024) : link certificate**

UI/UX Desiger (2023) : link certificate

PROJECTS

App Shop Sport   **Sep 2023 - Dec 2023**

Participants: 1

Github: https://github.com/nhonam/Project_Graduate_Android

Description: Build a sports specific e-commerce application that uses chatbots to recommend products on the website for management.

Technologies and tools: Java, SpringBoot Framework, Firebase, Flask, Python, MySQL, NodeJS

E-commerce website   **Mar 2022 - May 2022**

Participants: 2

Gitlab: https://github.com/nhonam/Ecomerce_Website_BE_FE_Mobile

Description: E-commerce website, users can buy or post products for sale

Technologies and tools: ReactJS, MongoDB, NodeJS, ExpressJS

Student manager credit system   **Jun 2022 - Aug 2022**

Participants: 1

Github: https://github.com/nhonam/CSDL_PT

Description: Credit system student score management application using distributed database

Technologies and tools: .Net, SQL Server, Distributed Database, C#

Coffee shop manager   **May 2022 - Jul 2022**

Participants: 2

Github: https://github.com/nhonam/quanlyquancafe

Description: Coffee shop management website, customers can order drinks

Technologies and tools: Java, Spring MVC, SQL Server, JSP Servlet, Boostrap
